ADVANCES IN COLLOID AND INTERFACE SCIENCE

Contents

Special Issue: Characterization of Porous Materials: From Angstroms to Millimeters

Foreword 1

Adsorption methods for the characterization of porous materials
K.S.W. Sing (UK) 3

Surface and pore structure characterisation by neutron scattering techniques
J.D.F. Ramsay (France) 13

In situ small angle neutron scattering study of benzene adsorption in the porous SiO_2 glass CPG-10-75
E. Hoinkis (Germany) 39

Structure of Ru–Ti oxide aerogels: a SANS study
C.I. Merzbacher, J.G. Barker, K.E. Swider. D.R. Rolison (USA) 57

Off-lattice reconstruction on porous media: critical evaluation, geometrical confinement and molecular transport
P. Levitz (France) 71

CAEDMON analysis of adsorptive energies of glass filaments
S.P. Wesson, J.J. Vajo (USA) 107

Classification of Gibbs adsorption isotherms
M.D. Donohue, G.L. Aranovich (USA) 137

Simulation studies of sorption in model cylindrical micropores
W.A. Steele, M.J. Bojan (USA) 153

Adsorption in zeolites: intermolecular interactions and computer simulation
D. Nicholson, R.J.-M. Pellenq (UK, France) 179

Density functional theory model for calculating pore size distributions: pore structure of nanoporous catalysts
P.I. Ravikovitch, G.L. Haller, A.V. Neimark (USA) 203

Needs. status, techniques and problems with binary gas adsorption experiments
O. Talu (USA) 227

Textural and chemical characterization of microporous carbons
F. Rodríguez-Reinoso, M. Molina-Sabio (Spain) 271

Characterization of porous carbons with high resolution α_s-analysis and low temperature magnetic susceptibility
K. Kaneko, C. Ishii, H. Kanoh, Y. Hanzawa, N. Setoyama, T. Suzuki (Japan) 295

Characterization of aerogels
G.W. Scherer (USA) 321

New perspectives in mercury porosimetry
C.A. León y León (USA) 341

On the possibility of characterising mesoporous materials by permeability measurements of condensable vapours: theory and experiments
K.P. Tzevelekos, E.S. Kikkinides, A.K. Stubos, M.E. Kainourgiakis, N.K. Kanellopoulos (Greece) 373

Porous media transport descriptions—non-local, linear and non-linear against effective thermal/fluid properties
V.S. Travkin, I. Catton (USA) 389

Soil organic matter as a nanoporous sorbent of organic pollutants
J.J. Pignatello (USA) 445
